BIODIVERSITY CONSERVATION TRUST FOUNDATION (BCTF)

Founder: Dr. M. A. Bashar

Advisory Board

Prof. Dr. Abu Hassan Ahmad, Malaysia	Prof. Dr. Marc Jarry, France
Prof. Dr. A. R. Shakoori, Pakistan	Dr. Gerard Fabres, France
Prof. Dr. Z. N. Tahmida Begum, Bangladesh	Prof. M. A. Halim Khan, Bangladesh
Prof. Dr. Musharraf Hossain Mian, Bangladesh	Prof. Dr. Mohammed Shafi, Bangladesh
Prof. Dr. Samiran Chakrabarti, India	Prof. Dr. A. T. A. Ahmed, Bangladesh
Prof. Dr. M. Nurul Islam, Bangladesh	Prof. Dr. Shahadat Hossain Mondal, Bangladesh
Prof. Dr. Pramod Kumar Jha, Nepal	Prof. Dr. Ahmed Mustafa, USA
Prof. Dr. Noor Jahan Sarker, Bangladesh	Prof. Dr. Md. Abbas Ali Khan, Bangladesh
Prof. Dr. Yearul Kabir, Bangladesh	Prof. Dr. Badrul Amin Bhuiya, Bangladesh
Dr. F. H. Ansarey, Bangladesh	Dr. Mokhlesur Rahman, Bangladesh

Editorial Board

Prof. Dr. M. A. Bashar — Editor-in-Chief

Prof. H. R. Khan — Associate Editor

Members

Prof. Dr. R. M. Shahjahan Department of Zoology, University of Dhaka	Prof. Dr. A. R. Mollah Department of Zoology, University of Dhaka
Prof. Dr. M. A. Bashar Department of Botany, University of Dhaka	Prof. Dr. M. A. A. Akhand Department of Genetic Engineering and Biotechnology, University of Dhaka
Prof. Dr. S. Hoque Department of Soil, Water & Environment, University of Dhaka	Dr. M. S. Alam Department of Zoology, University of Dhaka

Ex-officio member: General Secretary, BCTF

The Journal of Biodiversity Conservation and Bioresource Management

In today's world, one of the concerned issues to humans is biodiversity and its protection. At present the management and sustainable conservation of biodiversity on the planet is the greatest challenge for human civilization in the planet now. Unfortunately, the term is not well recognized yet to the people at its optimum use. Biodiversity is a complex concept referring to the variety of living entities on the planet in association with their surroundings. The conceptual abstract encompasses three basic components of biodiversity, namely ecosystem diversity, species diversity and genetic diversity. Biodiversity embraces proper distribution and sustainable management of bioresources, analysis of ecosystem services and assurance of conserving genetic resources. The components are inter-linked; biodiversity conservation needs conservation of the linkage through proper researches in the field. Through the integration with diverse disciplines, biodiversity plays priceless contributions in different horizons, such as poverty, food security, livestock, fisheries, forest, wildlife, transport sector, trade policy, ecotourism, human health etc. of our life. Immense implications of biodiversity in economic as well as environmental aspects are truly inevitable. When the precious values of biodiversity in various aspects often remain unjustified behind our vision and beyond our perception then bioresource key-element assessment might be performed by aiming to optimize and evaluate the efforts on researches delivered by the biodiversity researchers. An opportunity for sharing would be created through launching such a new journal to document the researches. It will promote the sharing of ideas on utilization, reliability and sustainable use of bioresources among the researchers through enhancing network and communication in a scholastic way. Focusing the aim, it stands necessary now to express towards the world about the necessity of biodiversity, value of biodiversity, protection and conservation of biodiversity. Our aim is to reach the goal by materializing the following tasks:

- *To focus researches on biodiversity, conservation of biodiversity and management of bioresources at local as well as global levels;*
- *To accommodate outcomes of researches through collaboration and cooperation among the organizations of various disciplines at national and international levels;*
- *To select key words in the field of biodiversity and bioresource management following a technique by going through the journal; examples would be stated as waste-product management, colonization, colonization of butterflies, synchronization of coincidences (temporal and spatial) of biotic factors, biotic epicentre, identification of bioresources, bioresource managements, etc.;*
- *To enhance quality of writings as well as inspiring researchers to deliver their optimum efforts towards researches in the field of biodiversity and bioresource management;*
- *To encourage the researchers in the above disciplines towards the management of human resources also in the society.*

Therefore, considering immense importance of biodiversity we intend to launch a scientific research based new journal entitled “***Journal of Biodiversity Conservation and Bioresource Management***” as the spokesman of biodiversity aiming towards the documentation of researches on biodiversity and related fields. The Biodiversity Conservation Trust Foundation (BCTF) intends to take responsibility for bringing the journal to light and we hope that it will fulfill the aspiration of biodiversity researchers. It will commence an open access for implementing strategies to publicize the researches' results to the public for creating and raising awareness among people to make them 'realized' the practicality about the vast roles of biodiversity and bioresources in their daily life.

CONTENTS

Bashar, M. A. and H. R. Khan - Vision on bioresource recognition and bioresource management: Bangladesh perspectives	1
Khan, M. A. H. and M. A. Hossain - Organic mulches and conservation tillage: ground resources exploitation by quality protein maize (QPM)	15
McCain, P., P. Quarrar and A. Mustafa - Capsaicin supplemented feed and its effects on stress modulation in Nile tilapia	25
Azadi, M. A. and M. Arshad-ul-Alam - Biodiversity and conservation of fisheries resource of Halda river	39
Alam, M. S., S. Rahman, H. Jahan, A. Sultana, R. M. Shahjahan and R. A. Begum - PCR-sequencing of mitochondrial <i>16S rRNA</i> gene of <i>Labeo rohita</i>	53
Hossain, M. S., M. Z. Alam, M. R. U. Miah, M. I. H. Mian and M. T. Hossain - Effect of soft chemicals and tobacco leaf-smoke to control punctured pupa disease of honey bee, <i>Apis mellifera</i> L. in the dearth period	59
Bashar, M. A., H. R. Khan, S. Rahman, Eftesum, K. Chowdhury, M. M. Alam and G. Moula - Wildlife conservation through butterfly colonization	71
Nasiruddin, M. and H. Hoque - Abundance and diversity of insect fauna in four spots of Chittagong University Campus	83
Begum, H. A. and M. S. Hossain - Bee-plants around an apiary in Gazipur district of Bangladesh	93
